MOOC

Building School-Company Partnerships

© Jacob Lund Photography/Adobe Stock

The skills needed to live and work are changing. How can you prepare your students for the future workforce and for a more sustainable economy and society? Join this course to discuss how partnerships between schools and companies can improve the understanding of the workforce's needs, bridge the gap between work skills and school lessons and improve careers awareness. Explore how the workplace can add value to teaching and learning and help students develop not just the skills necessary to ensure their employability, but also the essential life skills they will need to thrive in societies shaped by the green and digital transitions.

Learning objectives:

- Explore how building school-company partnerships can improve both your professional development and the education of your students
- Learn how to develop a school-company partnership in practice considering your context
- Develop an action plan for an effective school-company collaboration

Key information:

- Start date: 7 November
- End date: 14 December
- Estimated workload: 3 - 4 hours per week
- Duration: 5.5 weeks
- Language: English
- Target audience: educators from secondary education and VET schools interested in building school-company partnerships.
